

ASUS Ascent GX10 AI Supercomputer – 128GB, NVIDIA GB10, ConnectX-7

Description

ASUS Ascent GX10 AI Supercomputer for Enterprise AI and HPC

The ASUS Ascent GX10 AI Supercomputer is a next-generation high-performance computing solution designed to meet the growing demands of artificial intelligence, machine learning, and data-intensive workloads. The ASUS Ascent delivers exceptional processing power, scalability, and efficiency, making it ideal for enterprises, research institutions, and advanced IT environments.

ASUS GX10 AI Supercomputer for Enterprise AI Workloads

The ASUS Ascent GX10 OpenClaw PC is a next-generation enterprise AI computing system designed for artificial intelligence, machine learning, and high-performance computing workloads. Built for demanding business and research environments, it delivers exceptional processing power, scalability, and efficiency.

Powered by the advanced NVIDIA GB10 Grace Blackwell Superchip, this system integrates CPU and GPU performance into a unified architecture. This enables faster data processing, improved AI training, and reduced latency for complex workloads.

With 128GB Coherent Unified System Memory, the platform ensures smooth data sharing between components, eliminating bottlenecks and improving efficiency for deep learning, large language models, and real-time analytics.

A 4TB PCIe 5.0 SSD provides ultra-fast storage performance, allowing rapid access to large datasets and improving system responsiveness in enterprise environments.

The inclusion of NVIDIA ConnectX-7 networking technology enables high-speed, low-latency communication across distributed systems, making it suitable for scalable AI infrastructure and data center deployment.

Additionally, the system supports Agentic AI capabilities, enabling intelligent automation and adaptive AI workflows for modern computing needs.

Designed in a premium Stellar Grey chassis, it combines industrial-grade performance with a professional design suitable for enterprise environments.

Key Features

- NVIDIA GB10 in ASUS Ascent GX10 AI Supercomputer
 - 128GB Memory in ASUS GX10 AI Supercomputer Platform
 - 4TB PCIe 5.0 Storage in ASUS GX10 System
 - ConnectX-7 Networking in ASUS AI Supercomputer
 - Agentic AI Support
 - Enterprise AI & HPC Optimization
-

Ideal Use Cases

- Artificial Intelligence & Machine Learning
 - Large Language Model Training
 - Big Data Analytics
 - Scientific Simulations
 - Cloud & Edge AI Infrastructure
-

Why This System Stands Out

This enterprise AI platform is built for organizations that require extreme performance, scalability, and reliability. It accelerates AI development workflows and supports next-generation computing applications with ease.
