

CADDY FOR R730 2.5

Description

Caddy for R730 2.5-Inch Drive Bay

Supertech Web Store

The **caddy for R730 2.5-inch drive bay** is a replacement drive tray intended for mounting a compatible drive in a Dell PowerEdge R730 server with a 2.5-inch drive-bay configuration. It is suitable for customers replacing a missing tray or preparing a compatible server bay for a drive installation.

Check Compatibility Before Ordering

The server model alone is not enough to confirm the correct caddy. Before purchasing, compare the required tray with your existing caddy and confirm your server's drive-bay configuration. Check the caddy part number, mounting points, connector clearance, and front latch design.

If you are unsure which tray you need, send us a clear photograph of your existing caddy, its part number, and your server details so we can help check suitability.
