Essential features for any business

The 11th Gen Intel® Core™ i7 processors offer businesses the performance, manageability and stability of an established enterprise class platform while still being able to seamlessly work on a go thanks in part because they’re complemented by optional NVIDIA MX 450 GPUs that can handle graphic intensive applications without stutter or lag! Connectivity isn’t lacking either with Wi -Fi 6 capability providing reliable connectivity through fast LTE mobile broadband speeds up until450 Mbps (or other technologies).

Modern design to boost productivity

The Latitude 3520 features an all-new design that’s smaller, lighter and more beautiful than ever. With its dark finish polished sidewalls thin bezel this device is perfect for work or play! The larger keyboard makes typing easier while 10% bigger touchpad gives you superior control over your laptop without sacrificing any ease when navigating through different screens on the go as well as enhanced display panels which allow users brighter view with 250 nit full hd displays making it easy to see what’s going inside programs
