

Dell PowerEdge R650xs Rack Server Intel Xeon Silver 4310 2.1G 16GB RAM
480GB SSD SATA SAS 3 Year

Description

**Dell PowerEdge R650xs Rack Server Intel Xeon Silver 4310 2.1G 16GB RAM
480GB SSD SATA SAS 3 Year**

The **Dell PowerEdge R650xs Server** is a powerful rack server designed for high-efficiency workloads. It features an Intel Xeon Silver 4310 2.1GHz processor, 16GB RAM, and a 480GB SSD with SATA/SAS support — all backed by a 3-year warranty. Available now at **Supertech**, your trusted Dell distributor in the UAE.

Features & Design

Your innovation engine

The Dell PowerEdge R650xs is designed to meet a specific set of requirements for medium-duty workloads with enterprise-class performance and capabilities.

Performance and scalability for dense data center computing

The Dell PowerEdge R650xs with 3rd Generation Intel® Xeon® Scalable processors is designed to address emerging technologies by delivering a combination

of right-sized enterprise features, performance and scalability for virtualization, cloud, database scale-out and high-performance compute workloads.

Supports up to 32 cores per CPU, and up to 16x DDR4 RDIMMs at up to 3200 MT/s

Built for fast growing solutions with an optimal footprint and Multi Vector Cooling 2.0

Manage with iDRAC9 Enterprise, OpenManage Enterprise and Plugins, iDRAC Direct, and Quick Sync 2.0

Full-stack management integration with Microsoft, VMware, ServiceNow, Ansible and many other tools for multiple operating environments, from on-premises to cloud to edge.

Systems Management and Security Solutions

OpenManage systems management

The Dell Technologies OpenManage systems management portfolio helps tame the complexity of your IT environment with tools and solutions to discover, monitor, manage, update, and deploy your PowerEdge infrastructure.

Intelligent Automation

PowerEdge and OpenManage solutions integrate tools across the portfolio to help organizations automate the server lifecycle, optimize operations, and scale efficiently.

Built-in security

PowerEdge servers are made with a cyber resilient architecture that builds in security at every phase of the product lifecycle, from the silicon root of trust and secured component verification, to signed firmware and drift detection, to BIOS recovery.

Dell Technologies offers complete end-to-end services

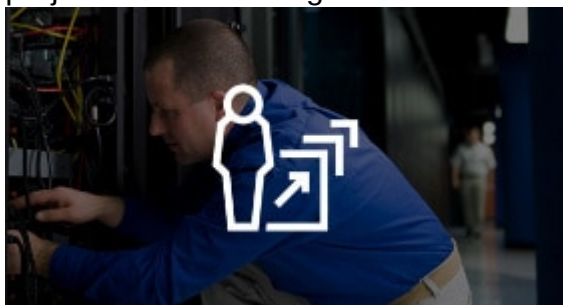

Optimizing the IT lifecycle is vital. We have expert services for all lifecycle phases that save you time and resources, reduce effort, and improve your IT experience.

Consulting

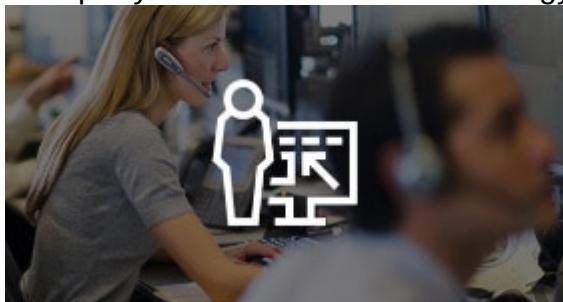

Consulting services give expert guidance to help you grow, optimize and transform your IT environment at your own pace and budget. We employ a broad range of

certified consultants and engineers, backed by program management teams, who can deliver deep technical expertise. We give you the confidence that your project will be done right and on time.

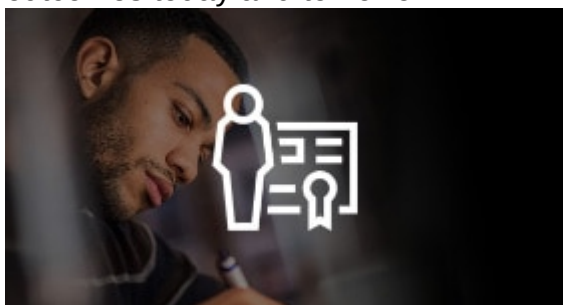

Support

Gain the freedom to focus on your business transformation with the support expertise and insights Dell is known for across the globe. Choose the right support based on the criticality of specific systems with available automated predictive analysis, collaborative third-party assistance and a Technology Service Manager.

Deployment

ProDeploy Enterprise Suite helps you get more out of technology starting on day one. Residency Service provides ongoing transition assistance to accelerate adoption. Trust our experts to lead deployments from basic hardware installations through planning, configuration and complex integrations to help you achieve business outcomes today and tomorrow.

Education

Education Services offers an expansive suite of training services with multiple delivery methods, including instructor-led, self-paced online and virtual instructor-led training. With comprehensive and flexible training programs, we make it easy to ensure your staff has the skills they need to successfully manage and utilize your new technology to its full potential.
