

Dell PowerEdge T160 Tower Server, Intel Xeon 6 Performance 6315P, 16GB DDR5, 2TB HDD, 300W, 3-Year Warranty

Description

?? Dell PowerEdge T160 Tower Server

The Dell PowerEdge T160 is a reliable, entry-level tower server designed for small to medium businesses that need secure, efficient, and scalable performance. Powered by an Intel Xeon processor and DDR5 ECC memory, it delivers dependable computing for everyday business workloads such as file sharing, email, database hosting, and business applications.

Its tower form factor fits seamlessly into office environments, offering quiet operation and easy deployment without the need for a dedicated server room. With iDRAC9 Enterprise, IT administrators gain powerful remote management and monitoring capabilities, reducing downtime and simplifying maintenance.

Built with enterprise-grade security, including TPM 2.0 and secured component verification, the PowerEdge T160 ensures your business data stays protected while providing the flexibility to grow as your needs expand.
