Features & Design

Performance you need

Everyday tasks are quickly handled with ease using up to 12th Gen Intel® Core™ Processors. Enjoy the smooth performance of up to
16GB DDR4 SSD. And with a 41 or 54 Whr battery, plus up to an 80% charge in one hour using ExpressCharge,
you know you can rely on your device to power through the day.

Work with speed and comfort

Focus on the work at hand with a 3-sided narrow border. The large touchpad and keycaps, along with a lift hinge for more ergonomic wrist
angles and increased airflow, all make for more relaxed use. An array of ports and slots means you can get connected to what you
need and a spill-resistant keyboard means less stress if an accident happens. Plus, this TÜV Rheinland certified laptop with Dell
ComfortView software technology helps reduce harmful blue light emissions to optimize eye comfort over extended screen time.

Stay protected

The Trusted Platform Module 2.0 is a commercial-grade security chip installed on the motherboard that creates
and stores passwords and encryption keys. It verifies that the computer has not been tampered with before
booting up and protects your data against external software attacks. The optional fingerprint reader with Windows Hello allows you to easily and securely log in with just one touch.

Stay Secure, Be Productive

Start secure. Stay Secure. Organizations report a 58% drop in security incidents with Windows 11 Pro devices.
Windows 11 Pro devices help you simplify your workday and improve productivity. Switch seamlessly between locations. Blaze through your to-do list with
AI-powered multitasking, features to get organized in a snap, and performance to speed demanding workloads to completion 42% faster on average.
