Features

Blitz through any task

15.28^{mm}

Razor thin with a starting weight of 1.23 kg.

2^x

Double the power.

80%

Recharge in less than an hour with ExpressCharge.

Supertech Web Store

Engineered to give you the best experience.

Simplified. Modern. Seamless.

A collection of new, edge-to-edge interfaces simplify the overall design of the XPS 13 Plus, delivering a sleek, harmonious surface.

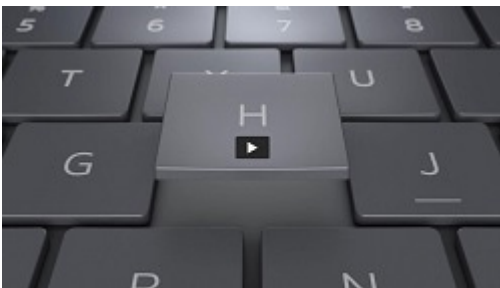

These enhanced elements also enable faster interactions, so users can create and maneuver with ease.

Capacitive touch function row

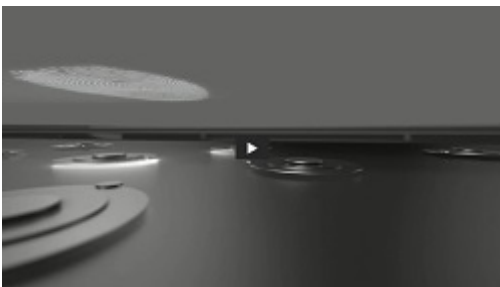

A backlit touch function row lets you toggle between media and function keys with ease, bringing forward only the icons you care about.

Zero-lattice keyboard

Stretching from edge-to-edge, this smooth, touch-friendly keyboard has larger and deeper keycaps than before, for a fast, efficient and comfortable touch typing experience.

Seamless glass touchpad

Get highly precise, responsive feedback on a seamless glass haptic touchpad that unifies and elevates the simple, modern design of the XPS 13 Plus.

Life-like visuals, immersive sound

Get lost in photos, movies and more with InfinityEdge displays that deliver high brightness, precise detail with up to 4K+ resolution and vivid color, including an OLED option, so your content comes to life. Plus, enjoy music and hear video calls with ease, thanks to a new quad speaker design that provides a louder, broader range of sound.

No intermissions. Minimal interruptions.

Experience up to 13 hours of battery life with an FHD+ display when streaming your favorite shows on Netflix's Windows 11 app, up to 7 hours with an OLED display, or up to 7 hours with a 4K+ display

Maximum battery life is impacted by the configuration purchased and how you use your PC. Higher resolution panels, OLED, WiFi usage, panel and performance settings can decrease battery life. Whether you're streaming, surfing, or working can also impact battery run time. You can increase battery life by lowering screen brightness and closing background applications.

Up to 13 hours of battery life with an FHD+ display.

Up to 7 hours with an OLED or 4K+ display.

Premium design

The new XPS 13 Plus was crafted with CNC-machined aluminum and glass to provide a simple, yet complete sensorial experience. Interfaces were innovated, tone-on-tone colors were added and a delicate balance was struck—all to improve efficiency and create a laptop that's thin, lightweight and luxurious. Available in a Platinum color.

More sustainable than ever

For the first time, the XPS 13 Plus is using low carbon aluminum in the chassis, thereby reducing its carbon footprint. The XPS 13 Plus will also ship in all-new packaging made from 100% recycled or renewable content.

Linux-based developer edition

The new XPS 13 Plus developer edition represents the 10th generation system to come out of Project Sputnik. It comes with the option to preload Ubuntu 22.04, meaning it's perfect for those looking to code on a strikingly elegant, Linux-based system that just works.
