

HP USB-C G5 ESSENTIAL DOCK

Description

HP USB-C G5 ESSENTIAL DOCK

Features

Seamless Productivity

Effortlessly go the extra mile with just a single USB-C® cable . This essential HP USB-C G5 Dock seamlessly powers and supports 4 USB-A ports for all your accessories, up to 3 high-res displays , and stable Ethernet connection—all while delivering 65W of power to your laptop.

More Ports, Less Constraints

This essential HP USB-C G5 Dock is designed to work with what you're working with . It's compatible with most USB-C® or Thunderbolt™ enabled PCs , and its various ports open the way to all your accessories.

Stay up to date

Keep your workforce up-to-date with connected firmware updates for your docking fleet .

Expand What's Possible

Connected Firmware Update

IT can manage dock firmware updates while connected to the host PC.

PXE Boot

Boot computers via a network interface, allowing IT to remotely set up an employee's device.

LAN/WLAN Switching

For no interruptions in your connectivity, your HP USB-C G5 Dock turns off WLAN antennae automatically when connected to the LAN cable. When unplugged from the LAN cable, your device will automatically switch from wired network connection to Wi-Fi®.

MAC Address Pass-Through

Thanks to MAC address pass-through with full functionality, IT can easily identify and track their notebook fleet when connected through the dock's LAN.
