Key Features

High Performance
HPE DDR4 Standard Memory matches the performance capabilities of the new generation of Intel® processors.

HPE DDR4 Standard Memory reduces downtime and lowers energy costs using advanced error detection.

High Reliability
HPE DDR4 Standard Memory provides excellent quality and support for a selection of HPE Gen10 and Gen9 servers.

HPE engineers quality and reliability into every HPE DDR4 Standard Memory product.

Increased Efficiency
HPE offers an affordable solution for small and medium business and remote and branch office customers with DDR4 Standard Memory.

Looking for a high-performance server with 32GB RAM, 8-core processing, and 1000W PS for your enterprise? Explore the HPE ProLiant DL380 Gen11 Server — designed for heavy-duty workloads and scalability.
