

## HPE 16GB Single Rank x8 DDR4 3200 CAS 22 22 22 Unbuffered Standard Memory Kit

### Description

#### HPE 16GB Single Rank x8 DDR4 3200 CAS 22 22 22 Unbuffered Standard Memory Kit

##### Key Features

##### High Performance

HPE DDR4 Standard Memory matches the performance capabilities of the new generation of Intel® processors.

HPE DDR4 Standard Memory reduces downtime and lowers energy costs using advanced error detection.

##### High Reliability

HPE DDR4 Standard Memory provides excellent quality and support for a selection of HPE Gen10 and Gen9 servers.

HPE engineers quality and reliability into every HPE DDR4 Standard Memory product.

##### Increased Efficiency

HPE offers an affordable solution for small and medium business and remote and branch office customers with DDR4 Standard Memory.

Looking for a high-performance server with 32GB RAM, 8-core processing, and 1000W PS for your enterprise? Explore the [HPE ProLiant DL380 Gen11 Server](#) — designed for heavy-duty workloads and scalability.
