

HPE 1TB SATA 7.2K LFF RW HDD – 843266-B21

Description

HPE 1TB SATA 7.2K LFF RW HDD – 843266-B21

Overview:

HP SATA Hard Drives are designed for reliability and mass storage demanded by today's server and storage environments. The SATA Hard Drive portfolio is categorized into two categories: Entry (ETY) and Midline (MDL) Hard Drives. HP SATA Entry Hard Drives are the lowest unit-cost solution for entry level servers. Designed for economical reliability and performance for non-mission critical applications – Entry and Midline SATA Hard Drives provide the best price advantage for these lower workload environments. These Hard Drives are available in Small Form Factor (2.5in) and Large Form Factor (3.5in) for both hot plug and non-hot plug environments.

Looking for enterprise-grade performance and reliability? The [HPE ProLiant DL380 Gen11 Server with Intel Xeon Silver 4509Y 2.6GHz 8-Core CPU, 32GB RAM, MR408i-o Controller, and 8SFF Bays](#) is designed to meet your demanding business workloads. Now available at Supertech – your trusted HPE server distributor in Dubai.
