

HPE 6ft Qty 8 KVM CAT5 Cable – 263474-B22

Description

HPE 6ft Qty 8 KVM CAT5 Cable – 263474-B22

Category 5 (CAT 5) cable is typically used in local area networks (LAN) and premises cabling. CAT 5e cabling is an enhanced version of CAT 5. The stringent specifications ensure optimal transmission speeds and reduce crosstalk for reliable gigabit ethernet and data networks. HPE offers CAT 5e cables in various lengths and types: Lengths from 1.2m (4ft) to 15.2m (50ft) Straight-pinned and cross-pinned types

Media

- Improved console and user management over an Internet Protocol (IP) based network
- Extends language support
- Includes new scanning and diagnostics features

Need a reliable power solution for your servers? Explore the [HPE 1000W Flex Slot Titanium Power Supply Kit](#) – model P03178-B21. Delivers high-efficiency performance with hot-plug capability, 94% Titanium-level efficiency, and optimized power density. Now available at Supertech!
