

Lenovo CD ThinkSmart View 18781Y Wifi 2GB Ram Touch Screen Wireless LAN 8 HD Smart Display Black-ZA690033AE

Description

Lenovo CD ThinkSmart View 18781Y Wifi 2GB Ram Touch Screen Wireless LAN 8 HD Smart Display Black-ZA690033AE

The **Lenovo ThinkSmart View Display** (Model: ZA690033AE) is a powerful 8" HD smart display with WiFi, Touchscreen, and 2GB RAM, designed to streamline video conferencing, productivity, and virtual communication. Featuring wireless LAN and a sleek black design, this device brings crystal-clear visuals and hands-free convenience to any workspace.

Features

X1 Headset sold separately

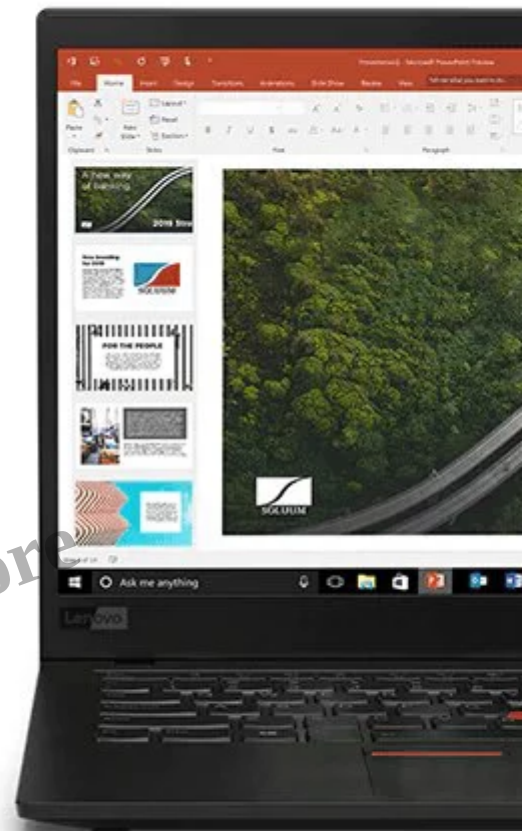

Get more out of the day

Your PC has limited multitasking capability—let the ThinkSmart View for Microsoft Teams handle the collaborative and administrative aspects. This device is easy to deploy and maintain, and expertly engineered for reliable, always-on usage. Plus, its intuitive touchscreen interface—with a one-touch Microsoft Teams meeting start—means no more dial-in delays. Watch your productivity soar!

Conduct better meetings

Collaboration is a breeze with the voice-ready ThinkSmart View for Microsoft Teams. Use it to engage in voice or video calls without impacting the work in progress on your PC. You'll unlock richer content-centric meetings and enjoy clear audio in private settings with powerful built-in mics and speakers. Use it in public with the optional ThinkPad X1 Active Noise Cancellation Headphones for optimal audio experience.

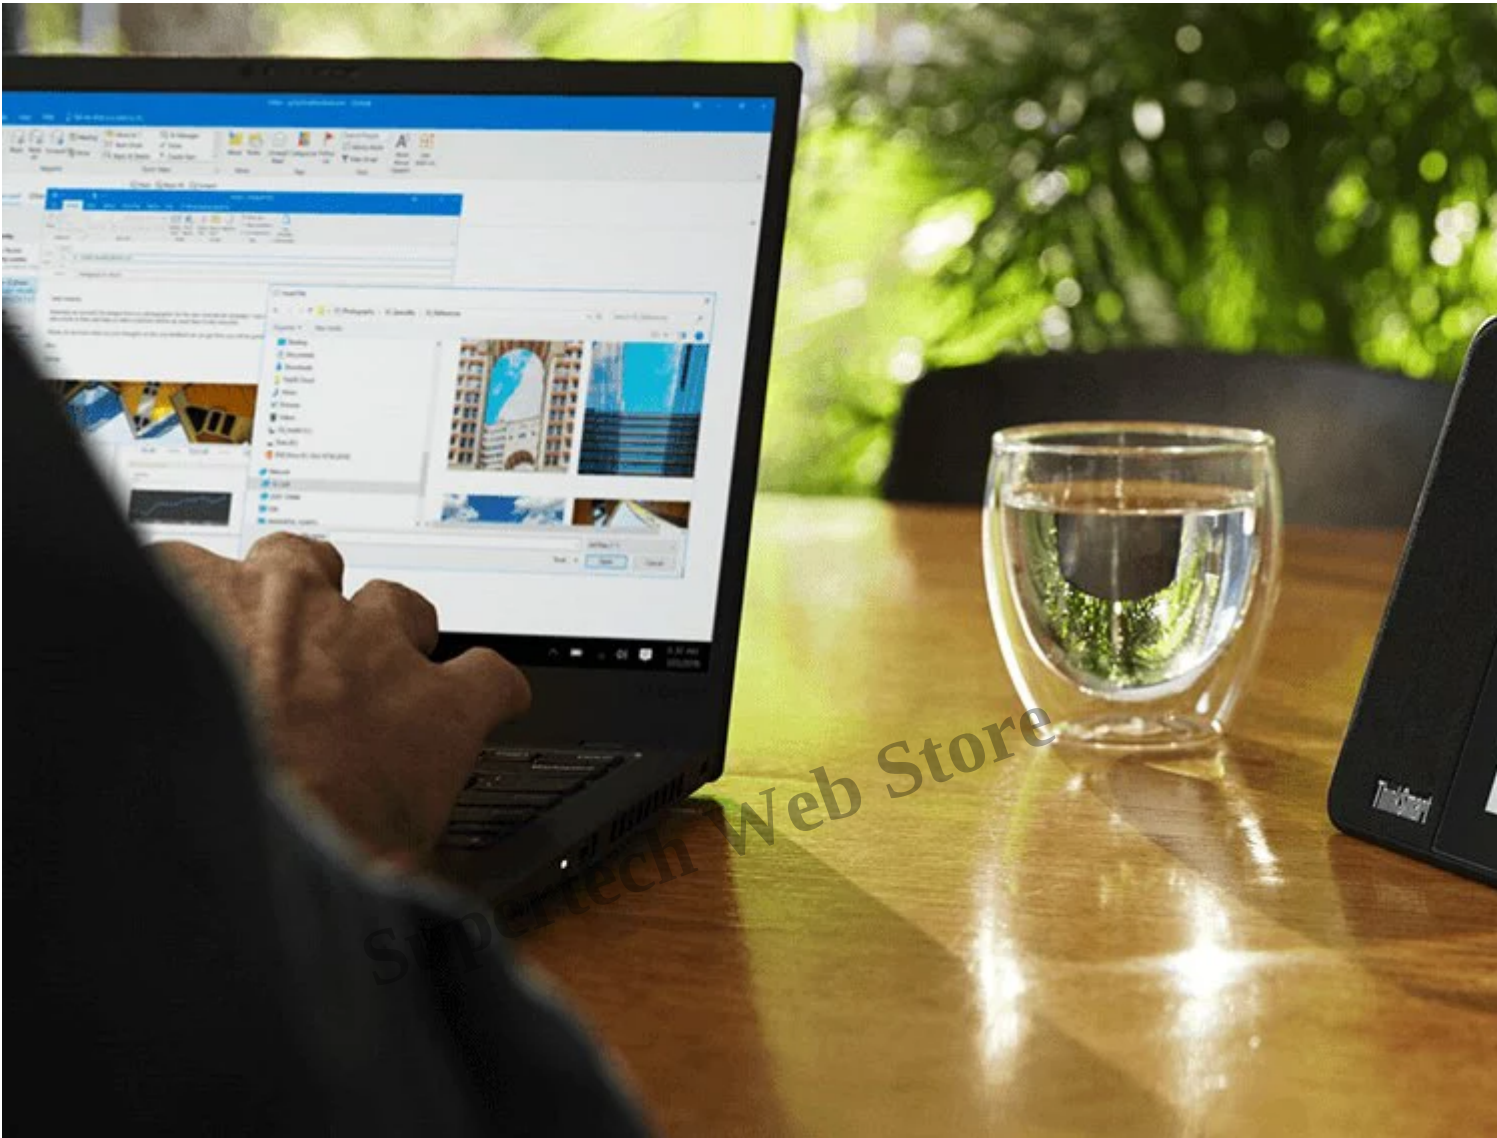

Laptop sold separately

Enable the modern worker

The intuitive design on the ThinkSmart View for Microsoft Teams works across a variety of office spaces—including your home*, if you happen to be working remotely. It's flexible enough for hot-desking and common-area phone capabilities, including phone booths and other shared spaces. This all-in-one, dedicated device provides hands-free access to calendars, files, video conferences, and more.

*ThinkSmart View is not intended to be a smart home device; it is designed for business use, is intended to be managed and updated by an enterprise's IT department, and requires a commercial license from Microsoft.

Keep private work, private

The ThinkSmart View for Microsoft Teams features built-in security that works behind the scenes. A camera shutter and mic-mute button protect you from being seen or heard when you don't want to be. When you're not using the display, it stays locked with a four-digit personal identification number (PIN). And when it's paired with your system via Bluetooth[®], it locks in tandem with your PC.

Personalized services to maximize results

Lenovo's Smart Office Professional Services—available at additional cost—provides custom services tailored for the Smart Office lineup, so you can make the most of these cutting-edge collaboration solutions. ThinkSmart View for Microsoft Teams includes Premier Support services with the following limitations: Premier Support requires depot service in lieu of on-site service; it's not eligible for parts and labor prioritization for work requests, and not eligible for the Lenovo Service Connect portal.
