

Lenovo LED Monitor L22E-40 21.5-67AFKACBAE

Description

Lenovo LED Monitor L22E-40 21.5-67AFKACBAE

Overview

The Lenovo's L22e-40 Monitor is designed to help you get more work done while also elevating your entertainment experience. Experience a boost in productivity on the large yet contemporary, 54.483cms (21.45) screen. Work documents and movies for entertainment will all look crystal-clear on the display's FHD (1920 x 1080) resolution. Get a wider view of those large excel sheets with the 3-side near-edgeless panel design. Enjoy cinematic movies and videos with your friends without having to cram in close, thanks to the wide-viewing angles of the VA panel, which produces deep, inky blacks for an even richer movie viewing experience. Its 72% NTSC colour space coverage makes colour-critical tasks a breeze. Support for AMD Freesync™1 and a rapid 75Hz refresh rate ensures that all your games run completely stutter-free and smoothly. Connecting your work or personal computers to the Lenovo L22e-40 is easy using its 1 x HDMI 1.4 and 1 x VGA input ports. Whether it's meetings or movies, enjoy rich clear audio on your preferred speakers or earphones using the monitor's audio out port. Natural Low Blue Light technology eliminates harmful blue light without colour distortion, so you don't strain your eyes while working. Your desk setup will look clean and contemporary with the monitor's 6.9 mm slim head design and cloud grey colour. The stylish stand comes with a wave base pattern which really accentuates the overall look of your workspace. Keep your setup clean with the in-built cable management and place your phone within easy reach on the built-in phone stand. Access all of the monitor's settings with ease using Lenovo's Artery Software2. Do your bit for the environment by choosing a monitor that's made with 85% recycled resin. The Lenovo L22e-40 Monitor is a great companion when it comes to getting work done with ease.
