

Lenovo L24e-30 23.8" FHD Monitor (75Hz) – 66BCKAC2UK

Description

Lenovo L24e-30 23.8" FHD Monitor (75Hz) – 66BCKAC2UK

DESIGNED WITH SIMPLICITY IN MIND

Why compromise on image quality of a monitor made for home? Enjoy your favorite movie with the family, or battle it out with an online squad of friends, while enjoying fluid visuals free from image tearing and stuttering thanks to a rapid 75 Hz refresh rate² and built-in AMD FreeSync 1 technology.

Switch or fine-tune the screen's brightness, contrast, and more, instantly and smoothly, without repeatedly pushing awkward physical buttons. Lenovo's exclusive and dedicated Artery software³ lets you easily shift settings to match different work, entertainment or gaming scenarios and always give you the best performance.

Slim and minimal

At just 7.1 mm thick, L24e-30's modern ultra-slim head looks weightless as it floats in space. With slim bezels barely framing its 3-side Near Edgeless display, you can focus on the breathtaking images produced by its VA panel display. Place two side-by-side for a practically gapless view. Supporting this is a chic sculpted wedge stand that not only tidies cables invisibly away, but also integrates a mobile phone rack into its base to keep your home perfectly free from clutter.

Comfort, any way you look at it.

L24e-30's 23.8-inch, FHD resolution, VA panel display produces rich, vivid colors, even when viewed from extreme angles up to 178°. Video conference with remote colleagues or work side-by-side with someone at home and you'll all see the same accurate, undistorted colors. And no matter how late into the night you have to crunch numbers, this monitor will safeguard your eyes from fatigue thanks to TÜV Rheinland Eye Comfort-certified technology that filters harmful blue wavelengths.

Smoother UX for you

Why compromise on image quality of a monitor made for home? Enjoy your favorite movie with the family, or battle it out with an online squad of friends, while enjoying fluid visuals free from image

tearing and stuttering thanks to a rapid 75 Hz refresh rate² and built-in AMD FreeSync 1 technology.
