Features

Stay cool even on intensive tasks

The best laptops deliver results even when you're doing difficult tasks or working long hours. The ThinkBook 14 Gen 4 won't let you down,

with up to 12th Gen Intel® Core™ processors with vPro Essentials, dual-SSD storage, and 40GB memory. Additionally,

Intelligent Cooling keeps things running smoothly by adjusting performance based on fan speed, thermal capacity, and battery life.

Seize the advantage with vPro

On select models, the ThinkBook 14 Gen 4's 12th Gen Intel® Core™ i Series processor is enhanced with Intel® vPro Essentials. This technology,
engineered for small business, maximizes productivity, enables smooth multitasking, assures premium connectivity and conferencing,
keeps your data secure, and streamlines PC management.

Sleek, distinctive look

The attractive, dual-tone ThinkBook 14 Gen 4 laptop is a feast for the eyes and packs a lot of power in a thin and light package

just 1.77cms (0.7) thin and starting at 1.4kg / 3.1lbs. With extremely narrow bezels and an 85% screen-to-body ratio, the frame is

barely any larger than the display itself—belying all the power that lurks beneath the laptop's elegant surface.

Teleconferencing with an AI twist

With teleconferencing the norm these days, the 35.56cms (14) ThinkBook Gen 4 laptop is built for better audio-video meetings.

AI-based noise cancellation limits ambient noise, so your colleagues can stay focused on what you're saying,

not what's happening around you. Choose from Private, Shared or Environmental settings based on where and how you're working.

Protect your business & your clients

The ThinkBook 14 Gen 4 includes Lenovo ThinkShield, our comprehensive portfolio of secure hardware, software and services.

Trusted Platform Module (TPM) 2.0 firmware encrypts your critical data, a self-healing BIOS restores the system to an

earlier version should it become corrupt, and Smart Power On lets you log in and boot up securely with your fingerprint. Plus,

the webcam privacy shutter blocks the camera lens when not in use.

Keep the focus on your work

Graphics options on the Lenovo ThinkBook 14 Gen 4 laptop include integrated Intel® Iris® Xe graphics—among Intel's best—as well as the

option of discrete NVIDIA® GeForce® graphics. A high-resolution FHD display is available with optional 100% sRGB color gamut

for true-to-life visuals and TÜV Rheinland Low Blue Light certification helps prevent eye fatigue. Touchscreen models are available, too.

Looking for a reliable laptop with Intel® Core™ Ultra 5, 8GB RAM, and 512GB SSD? We have the Lenovo ThinkBook 16 G7 i5-125U at Supertech with 1 Year Warranty. Best deal!
