Description

Lenovo ThinkBook 14 G6 Intel® Core™ i5-13420H 8GB RAM 512GB SSD DOS English 14?Wuxga 1 Year – 21KG00U0AK

Big on performance & productivity

Meet the Lenovo ThinkBook 14 Gen 6 (14" Intel) laptop, a state-of-the-art upgrade for your business. High-performing and ready to increase productivity, this device features 13th Gen Intel® Core™ processors. Enjoy the superior bandwidth of dual-channel memory configurations, for faster data transfer speeds and improved performance. Take your daily workflow to new heights.

Feels as great as it looks

Along with the sleek look and feel of the Arctic Grey aluminum chassis, the ThinkBook 14 Gen 6 laptop boasts an upgraded ergonomically redesigned keyboard. The keys are larger than previous generations and include a concave cap that curves to your fingertips — plus, the keys are made from 50% post-consumer recycled plastic. The expanded touchpad feels smooth and easy. And an F9 smart key can be customized to open any frequently used app — or keep the default, which links directly to our Services page.

Keeps you and your data safe

Rest easy with the protection of the ThinkBook 14 Gen 6 laptop's biometrics—from a fingerprint reader integrated with the power button, to facial recognition software that works with the optional infrared (IR) camera. ThinkShield, our comprehensive suite of security solutions, ensures your system is protected. Trusted Platform Module (TPM) firmware encrypts your data, and a self-healing BIOS restores critical info should your device ever become corrupted.

Collaborate smarter

An optional infrared hybrid camera takes videoconferencing to the next level. Enjoy rich, clear images on an even bigger screen (thanks to the 16:10 aspect ratio), with TÜV Rheinland Eyesafe® certification to ensure your comfort and safety. With AI-based noise cancellation and Dolby Audio™, say good-bye to background noises—people will hear you loud and clear, the same way you'll hear them. And when you don't want to be on camera, the webcam privacy shutter ensures you stay out of sight.

Durable by design

We use the US Department of Defense's MIL-STD 810H standards to create a balance of reliability and durability for our ThinkBook laptops. We test against 26 procedures to ensure they run in extreme conditions. These tests cover harsh variables like Arctic wilderness and desert dust storms, including temperature, pressure, humidity, vibration, and more.
