Cool Under Pressure. Just Like You

The Lenovo ThinkBook 15 Gen 4 (15? Intel) laptop stays cool under pressure. With up to 12th Gen Intel ® Core™

processors and optional dual-SSD storage—as big as 2TB—it can handle all your computing needs. Plus,

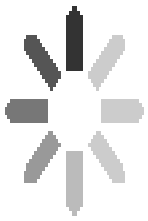

the Intelligent Cooling feature adjusts fan speed, thermal capacity, and battery life to keep the system up and running even under intense use.

Style that’s fully functional

Looking for a highly mobile, thin and sleek laptop? The stylish, dual-tone Lenovo ThinkBook 15 Gen 4 is only 18.9mm / 0.74? thin

and starts at just 1.7kg /3.75lbs. Modern Standby wakes the system in just one second upon opening the top cover and connects

online one second later. Plus, with narrow display bezels and an 88% screen-to-body ratio, you’ll appreciate the larger screen real estate and enjoy the view.

Teleconference like a pro

AI features on the ThinkBook 15 Gen 4 help keep teleconferences quiet and focused by limiting ambient noise. Multiple settings

let you tune your conference audio to your environment. Do you have trouble finding earbuds when you need them? The optional

Versa Bay is an innovative drawer within the laptop chassis that includes and charges a pair of earbuds.

So many connections

As laptops get smaller, some provide fewer connectivity options. Not Lenovo ThinkBooks, which have all the ports you need.

For fast file transfers, the ThinkBook 15 Gen 4 laptop has a Thunderbolt™ 4 port, along with USB ports, HDMI, and more to

connect printers and other peripherals. Plus, speedy WiFi 6E options let you quickly connect to crowded public platforms with little lag-time and buffering.

***Features shown in description may not be available on all products. Please refer to product**

specifications for product details.
***Image is for illustrative purposes. Actual touchpad has four haptic sensors**
