Features

Big inside & out

Want a business laptop that’s big on performance and improves productivity? The Lenovo ThinkBook 16 Gen 6 laptop

offers a state-of-the-art upgrade to your daily tasks. Featuring 13th Gen Intel® Core™ processors, this device redefines

mobility at work. The superior bandwidth of dual-channel memory configurations means faster data transfer speeds and

improved performance. Ample storage, smart security, and manageability features also help take your daily workflow to new heights.

Security that’s got your back — and front

Biometrics provide extra protection on the ThinkBook 16 Gen 6 laptop — from the fingerprint reader integrated with the power

button to the facial recognition software that works with the optional infrared (IR) camera. ThinkShield, our comprehensive suite

of security solutions, ensures your system is protected. Trusted Platform Module (TPM) firmware encrypts your data, and a

self-healing BIOS restores critical info should your device ever become corrupted.

Up your collaboration game

With the integrated camera, the ThinkBook 16 Gen 6 laptop makes video calling a cinch. Rich, clear images on an even bigger

screen (given the 16:10 aspect ratio) will make you feel like you’re in the same room as your colleagues. With AI-based noise

cancellation and Dolby Audio™, no more background noises — people will hear you loud and clear, the same way you’ll hear them.

What’s more, when you don’t want to be on camera, the webcam privacy shutter ensures you stay out of sight.

Designed for durability

We use the US Department of Defense’s MIL-STD 810H standards to create a balance of reliability and durability for our ThinkBook laptops.

We test against 26 procedures to ensure they run in extreme conditions. These tests cover harsh variables like Arctic wilderness and desert

dust storms, including temperature, pressure, humidity, vibration, and more.

Looks good, feels great

Along with the sleek look and feel of the Arctic Grey aluminum chassis, the ThinkBook 16 Gen 6 laptop boasts an upgraded ergonomically r

edesigned keyboard. The keys are larger than previous generations and include a concave cap that curves to your fingertips — plus, the keys

are made from 50% post-consumer recycled plastic. The expanded touchpad feels smooth and easy. And an F9 smart key can be customized

to open any frequently used app — or keep the default, which links directly to our Services page.

***Features shown below may not be available on all products. Please refer to product details page for specific product features.**
***Image is for illustrative purposes. Actual touchpad has four haptic sensors.**
