Description

**Lenovo ThinkCentre neo 30a 22 Gen 4 Intel Core I5-13420H 8GB RAM 512GB SSD
DOS English 1 Year – 12K3000XGP**

Features

Go all-in with a business all-in-one

Go all-in with an all-in-one PC that's built for business. The ThinkCentre neo 30a Gen 4 22" AIO runs on advanced 13th Gen Intel®Core™ processors—with

specialised performance and efficient cores for optimal multitasking, creative work, and more.

Save space & do more

All-in-one PCs fit nicely even in small work areas, taking little more space than a typical monitor. And the compact ThinkCentre neo 30a Gen 4 22" AIO truly

delivers, with built-in performance and a vibrant, 21.5" FHD display offering wide viewing angles and stunning visuals. Plus, we keep the planet in mind,

with packaging made from 65% post-consumer recycled content and ocean-bound plastics.

Usable. Versatile. Secure.

The ThinkCentre neo 30a Gen 4 22" AIO is quick to set up and easy to adjust. The PC and display are one unit, with multiple USB ports to connect your key peripherals, and the included Smart Cable Clip can help deter theft.

Business meetings made easy

AI Meeting Manager makes collaborating with colleagues far easier. Background noise is sharply reduced, so virtual meetings are clearer and quieter.

Translator, Subtitles, Voice-to-Text, Meeting Notes Editor, and other tools help ease many administrative chores. And with support for Alexa Show Mode,

you can even use the ThinkCentre neo 30a Gen 4 22" AIO as a voice-activated smart display.

Your future-ready office PC

The ThinkCentre neo 30a Gen 4 22" AIO can grow with you. The speedy DDR4 memory is similar—you can fill one or both slots, now or later.

Looking for something to make your new business PC stand out? There's a retractable webcam you can pop out when you choose to go on-screen or pop back in to stay private.

Cool under pressure—anywhere

The ThinkCentre neo 30a Gen 4 22" all-in-one stays cool—even when your work gets hot—thanks to our Intelligent Cooling Engine (ICE) 5.0. By intuitively controlling power consumption and temperatures within the PC, it delivers optimal performance when you need it. Plus, ICE 5.0 has four operating modes for different workplace environments, from airy corner offices to hot factory floors.
