

Lenovo ThinkCentre Neo 50t Tower Desktop G3 Intel Core I3-12100 4GB Ram 1TB HDD DOS-11SE000YGP

Description

Lenovo ThinkCentre Neo 50T G3 CI3 12100 4GB 1TB HDD DOS-11SE000YGP

The ideal combination of speed and sustainability, the ThinkCentre Neo 50t tower is ideal for your growing business. You'll like the clean, minimalist design, and you'll love the power it brings to your workday. This desktop PC tackles high-performance workloads seamlessly with 12

ThinkCentre Neo 50t Tower | Features

Takes productivity to a new level

Powered by 12th Gen Intel® Core™ processors, the ThinkCentre Neo 50t tower boasts high performance and a low carbon footprint. Whether you're processing massive datasets or simply working on graphics-intensive tasks, with up to 16 cores, these processors deliver the computing power you need.

Long-term business value

When it comes to responsible computing, the ThinkCentre Neo 50t tower raises the bar. The modern chassis looks great no matter where you place it, but what's even better is that it's made from 85% post-consumer content (PCC) resin. What's more, Ocean Bound Plastic for packaging demonstrates responsible computing. Low noise equals energy efficiency, and the Intelligent Cooling Engine (ICE) 5.0 for optimal power consumption will help you and your machine keep cool.

Remote, clean collaboration

Choose the optional WiFi for collaboration that's easy, convenient, and fast—no worry about a LAN cable. Just power on and connect to the internet. Plus, with Windows 11 Pro, you'll appreciate the Microsoft Teams integration with ThinkCentre Neo 50t tower for simpler, faster collaboration. Taking device collaboration to the next level, it is now easier with an optional Smart Cable to instantly connect

two computing devices while simultaneously operating them within one screen. And with the optional Smart Cable Clip, your workspace will be clutter-free with no distracting cables.

Secure by design

The ThinkCentre Neo 50t tower is protected by our ThinkShield security solutions—a suite of hardware and software that work together to safeguard both your device and your data. From discrete Trusted Platform Module (dTPM) 2.0 that encrypts your passwords, to physical security options, to a self-healing BIOS with BIOS Guard and Boot Guard, to smart USB protection—we've got you covered.
