Description

**Lenovo ThinkCentre neo 50t Gen 4 Intel Core i3-13100 4GB RAM 512GB SSD DOS
AR/ENG 1 Year – 12JD003YGR**

Business power with an earth-friendly spin

Go high and low with the ThinkCentre neo 50t Gen 4 Tower. For high performance, choose up to a 13th Gen Intel® Core™ CPU—with more processing cores than earlier versions. For low impact on the planet, rest easy knowing the sleek black chassis includes post-consumer plastic resins, packaging is 90% easy-to-recycle expanded polyethylene (EPE), and the system is certified to meet multiple important environmental standards.

Cool, quiet productivity

You'll hear and feel the difference. Equipped with the Intelligent Cooling Engine (ICE) 6.0, power consumption is optimised to keep the system cool—even when you're working hard. Multiple operating modes are suited to different business settings. Fan sounds and ambient noise are minimised, too.

New ways to share & collaborate

Collaboration is fast and easy on the ThinkCentre neo 50t Gen 4 Tower. Wired and wireless connectivity—up to WiFi 6—makes sharing project ideas a breeze. Remote meetings are a snap thanks to Windows 11 Pro and Microsoft Teams integration. And attaching an optional Smart Cable opens a world of possibilities, including connecting to another PC to leverage its storage and other components.

Device & data security

The ThinkCentre neo 50t Gen 4 Tower is protected by our ThinkShield security solutions—a suite of hardware and software that work together to safeguard both your device and your data. From discrete Trusted Platform Module (dTPM) 2.0 that encrypts your passwords, to physical security options, to a self-healing BIOS with BIOS Guard and Boot Guard, to smart USB protection — we've got you covered.
