

ThinkPad E16 Gen 4 Laptop – Core Ultra 5 325, 16GB RAM, 512GB SSD, 16" WUXGA, No OS – 21YC003CGR

Description

Lenovo ThinkPad E16 Laptop for Business

The Lenovo ThinkPad E16 laptop, SKU 21YC003CGR, combines an Intel Core Ultra 5 325 processor, 16GB RAM and a 512GB SSD. Its 16-inch WUXGA display provides room for everyday business tasks, from reviewing documents to preparing presentations. This configuration includes a carrying case and a one-year warranty. It comes without an operating system, so you can plan your software setup before putting the laptop to work.

ThinkPad E16 325 Performance and Multitasking

The Intel Core Ultra 5 325 processor and 16GB RAM provide a foundation for office applications, web research and communication tools. Before choosing your configuration, consider how many applications you use together and check their hardware requirements. Your software, workload and system settings will influence actual performance.

For team purchases, list the applications each employee needs. This helps you compare configurations against real working requirements rather than choosing solely by processor name.

A 16-Inch Display for Everyday Work

The 16-inch WUXGA screen offers a workspace for spreadsheets, presentations and business documents. Professionals who prefer a larger laptop display can consider this format for daily office use.

If you frequently travel between locations, compare the laptop's dimensions and weight with your portability needs. Confirm the exact display specifications before ordering if your work requires particular brightness or colour capabilities.

512GB SSD Storage

The 512GB SSD holds your operating system, applications and working files. Formatting and software installation reduce the space available for your documents.

Review your storage needs if you regularly handle large project folders or media files. Decide which files you need on the laptop and which your team can keep in approved cloud or shared storage.

Plan Your Operating System Setup

This configuration does not include Windows or another operating system. Before purchase, confirm compatibility with your preferred operating system and arrange any required licences.

Your IT team should also plan software installation, security settings and device management. Ask Supertech about setup assistance if you need help preparing the laptop for work.

Carrying Case, Warranty and Product Support

The package includes a carrying case and a one-year warranty. Contact Supertech Computers to confirm warranty terms, keyboard language, stock availability and delivery arrangements.

For drivers, user guides and technical assistance, visit [Lenovo's official support website](#).

For a quotation, share your required quantity and software requirements. Reference SKU 21YC003CGR so our sales team can identify the correct configuration.
