

Lenovo ThinkPad L14 Gen 4 Intel Core i7-1355U 8GB RAM 512GB SSD FHD DOS 3 Year – 21H10059GR

Description

Lenovo ThinkPad L14 Gen 4 Intel Core i7-1355U 8GB RAM 512GB SSD FHD DOS 3 Year – 21H10059GR

Features

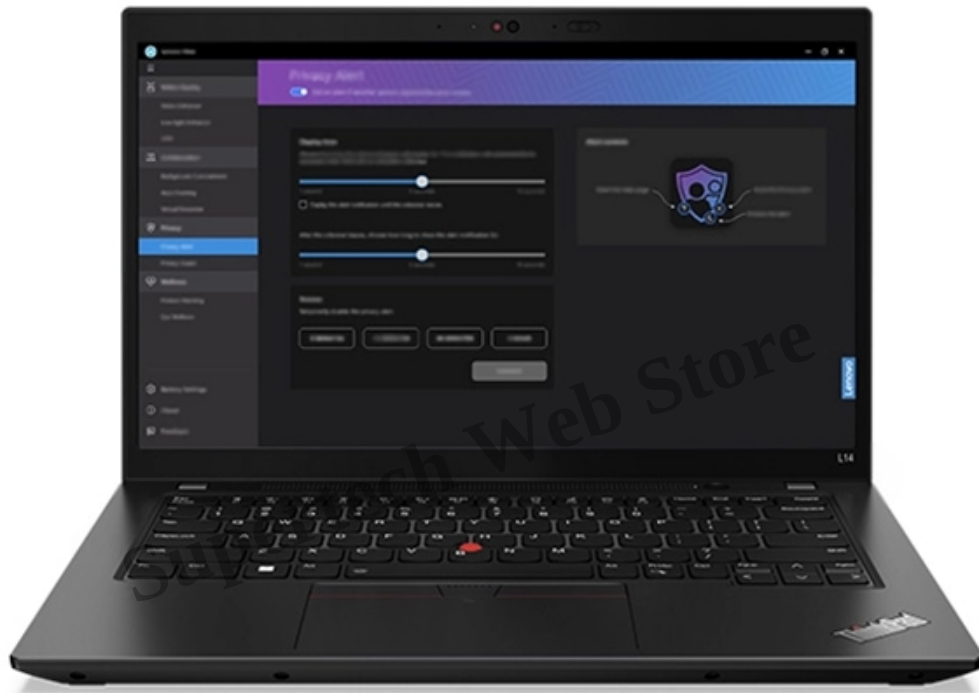

Powerful performance whenever you need it

Powered by Intel vPro® with 13th Gen Intel® Core™ U series processors and remarkable graphics, the ThinkPad L14 Gen 4

laptop will inspire productivity. Plus, with optional battery choices up to 57Whr for true all-day power, this device is a

high-performing partner for the work-from-anywhere workforce.

Everywhere connectivity

With the ThinkPad L14 Gen 4 laptop, you can choose 4G LTE WWAN* connectivity to keep up and running like a smartphone.

When combined with WiFi 6E** coverage, it keeps you online virtually anywhere. Plus, you can stay online, yet keep your

health in the forefront—Glance software alerts you about your posture and reminds you to look away from the screen to refocus your eyes.

* Optional WWAN availability varies by region and must be configured at time of purchase; it requires a network service provider.

** 6GHz WiFi 6E operation is dependent on the support of the operating system, routers/APs/gateways that support WiFi 6E,

along with the regional regulatory certifications and spectrum allocation

Smarter security

The ThinkPad L14 Gen 4 laptop comes with ThinkShield hardware and software components with integrated discrete

Trusted Platform Module (dTPM), the added security of Windows 11, Microsoft 11 Secured-core PC, and the Intel vPro®

platform deliver protection from every angle. What's more, the power button boasts an optional fingerprint reader for an additional layer of protection.

Reliability you can count on

We use the US Department of Defense's MIL-STD 810H standards to create a balance of reliability and durability for our

ThinkPad laptops. We test against 12 standards and more than 200 quality checks to ensure they run in extreme conditions.

These tests cover harsh variables like Arctic wilderness and desert dust storms, including temperature, pressure, humidity, vibration, and more.

Responsibly made & packaged

Every Lenovo device is manufactured using a low-temperature solder process to reduce emissions. By 2025,

we're committed to obtaining 90% of our global operations electricity from renewable sources, to remove one-million

tons of greenhouse gas emissions from our supply chain. Meanwhile, this laptop uses plastic-free packaging,

with 90% sustainable packaging and is comprised of recycled materials.
