SSD 16GB RAM Windows 11 Pro-21AH00BSUS**

Features

Supertech Web Store

Enabled you to truly work from anywhere

The ThinkPad T14 Gen 3 laptop is built to perform, anywhere. Powered by up to Intel® vPro® with 12th Gen Intel® Core™ i7 vPro® processing might and vast amounts of memory, it zips through any task. And with next-gen storage performance and powerful discrete graphics options, including Intel® Iris® Xe and NVIDIA® GeForce RTX™, it can take your productivity and creativity to new heights, wherever life takes you.

Healthy habits for an always-on digital world

When using PCs, it pays to rest our eyes and stretch the legs. That's why the ThinkPad T14 Gen 3 has built-in digital wellness features. For instance, Glance software lets track your screen time, check your posture, and adopt the 20-20-20 habit: every 20 minutes, look at something 20 feet away for 20 seconds. There's also the option of an Eyesafe[®] certified low blue-light display to help lessen eye fatigue.

For work, play, & everything in between

From videoconference calls to being creative and quality downtime, the ThinkPad T14 Gen 3 ticks every box. The 14" display has a huge screen-to-body ratio and an expansive 16:10 aspect ratio, while options include a WQUXGA touchscreen with Dolby Vision™ and an FHD camera. Together with Dolby Audio™ and Dolby Voice® AI noise-suppressing technology, a truly immersive audio/visual experience awaits play to help further prevent eye fatigue.

All you need to do more, remotely

Designed for busy on-the-go professionals, the ThinkPad T14 Gen 3 can run all day on a single charge. It comes with an array of ports, including Intel® Thunderbolt™ 4 and HDMI, and has blazing-fast Intel® WiFi 6E connectivity. It also has a backlit keyboard with TrackPoint and TrackPad for an enhanced, all-around typing experience.

*WiFi 6E requires Windows 11 Pro. Operation is dependent on the support of the operating system, routers/APs/gateways that support WiFi 6E, along with the regional regulatory certifications and spectrum allocation.

Smarter security, from the inside out

To help safeguard your data and protect your business from growing cyber threats, this ThinkPad is built with ThinkShield. This comprehensive portfolio of end-to-end protection and customizable security features includes advanced data encryption and biometric technology. In addition, there's also a PrivacyGuard display option to prevent shoulder-surfers from seeing sensitive information on your laptop.

Lean, mean, & green

Even with all its productivity- and creativity-enhancing features, this ThinkPad was designed with the planet in mind. We used recycled post-consumer content (PCC), such as plastic and natural materials, in various components, including the speaker enclosure, battery compartment, and adapter. It also comes with recycled and/or sustainably forested packaging and recycled PCC cardboard cushioning.

Proven reliability & durability

We use the US Department of Defense's MIL-STD 810H standards to create a balance of reliability and durability for our ThinkPad laptops. Measured against 12 stringent standards and more than 200 quality checks, they can run in the harshest of conditions, from the Arctic wilderness to desert dust storms. Our tests also include temperature, pressure, humidity, vibration, and more.

Looking for a durable and high-performance business laptop? The [Lenovo ThinkPad E14 Gen 5](#) with AMD Ryzen 5 7430U, 16GB RAM, and 512GB SSD offers speed, reliability, and solid design — available now at Supertech at the best price.
