A multitasker’s dream

Powered by 13th Gen Intel® Core™ vPro® processors, the Lenovo ThinkPad T14s Gen 4 laptop takes multitasking to the next level.

These CPUs intelligently allocate workloads to the right thread, on the right core, at the right time—which allows for better team

collaboration and productivity based on how you’re actually using your device. And with Intel® Evo™ certification, you can count on

consistent responsiveness, instant wake, all-day battery life, rapid charging, and intelligent video conferencing.

Built with recycled content

While you'll love the lightweight chassis, it's the recycled materials used in this machine that are the real delight. The ThinkPad T14s Gen 4

laptop is composed of 90% recycled magnesium on the keyboard frame for the Deep Black models and 22% carbon fiber on the top cover.

For the Storm Grey models, the top cover and keyboard frame include 50% recycled aluminum. Both models boast 55% recycled aluminum

on the bottom cover, recycled plastic enclosures for the speaker, battery, and AC adapter, plus packaging that's plastic-free with 90% recycled and/or sustainable materials.

Embrace your productivity

When you’re out on the road, you never know what the connectivity situation will be, or whether you’ll find an available electrical outlet.

The ThinkPad T14s Gen 4 laptop keeps you covered in both regards. Blazing-fast WiFi keeps you online when wireless coverage is

available—but if you’re out of range, you can connect just like a smartphone when you choose the WWAN* configuration. What’s more,

with the large battery and rapid-charging technology, there’s little need to be tethered to an outlet. No matter where your business

akes you, you’ll always be business-ready.

* Optional WWAN availability varies by region and must be configured at time of purchase; it requires a network service provider.

Use your phone through your laptop

With Intel® Unison™, you can put your laptop at the center of all that you do. Wirelessly connect your phone—either Android or iOS—to your

ThinkPad T14s Gen 4 laptop. Transfer files quickly and easily, even edit your photos and videos seamlessly on the big screen. Make and answer

calls directly from your PC, with full access to your phone’s contact list. You can even receive notifications on your laptop, as well as messaging.

No need to switch devices when you can do it all in one place.

Military-grade durability

We use the US Department of Defense’s MIL-STD 810H standards to create a balance of reliability and durability for our ThinkPad laptops.

We test against 12 standards and more than 200 quality checks to ensure they run in extreme conditions. These tests cover harsh variables like Arctic

wilderness and desert dust storms, including temperature, pressure, humidity, vibration, and more.

Smarter security solutions

ThinkShield, our comprehensive suite of security solutions, is integral to our ThinkPad laptops. Discrete Trusted Platform Module (dTPM)

encrypts your data. Human-presence detection works with the infrared camera to automatically lock your device when you move away.

Biometrics provide extra protection on the ThinkPad T14s Gen 4 laptop— from the fingerprint reader integrated with the power button to

the facial recognition software that works with the IR camera. And Intel vPro® helps prevent attacks on the OS, login credentials, and more.
