Corporate powerhouse

Powered by up to Intel vPro® with 13th Gen Intel® Core™ processing, the ThinkPad T16 Gen 2 laptop boasts high performance and

blazing-fast memory, storage, and connectivity—it will zip through even your most demanding tasks. IT admins appreciate the

convenience of remote deployment and manageability, while everyone can get behind the added security that comes with Intel vPro®.

Recycled is the new chic

The ThinkPad T16 Gen 2 laptop features a number of sustainable components including post-consumer content recycled

plastic in the enclosures for the speaker, battery, and AC adapter. Packaging is plastic-free with 90% recycled and/or sustainable content,

and the manufacturing process uses low-temperature soldering. The Storm Grey models include certified recycled aluminum

(50% top cover, 55% bottom cover). Both colors feature 90% magnesium on the C frame (surrounding keyboard).

Display options for everyone

If you’re like most people who spend lots of time on a PC your eyes can become tired and strained. The massive 16? display on

the ThinkPad T16 Gen 2 helps to prevent that by offering panels with Eyesafe® certification for low blue light. Choose the

stunning 4K OLED display with Dolby Vision® when every pixel counts, or go with lower resolution choices that offer touchscreens,

low power, and various color gamuts. All screens feature narrower bezels and a high screen-to-body ratio, which translates to added screen real estate on this device.

Cut the cords—or at least leave them behind

When you’re out on the road, you never know what the connectivity situation will be. The ThinkPad T16 Gen 2 laptop alleviates that

concern with lightning-fast WiFi that keeps you online when wireless coverage is available—but if you’re out of range, you can still

jump online just like a smartphone when you choose the optional WWAN* configuration. What’s more, with the option of two large

battery sizes and rapid-charging technology, there’s little need to be tethered to an outlet. No matter where the business takes you, you’re sure to stay productive.

* Optional WWAN availability varies by region and must be configured at time of purchase; it requires a network service provider.

Engineered to handle the extremes

We use the US Department of Defense’s MIL-STD 810H standards to create a balance of reliability and durability for our ThinkPad laptops.

We test against 12 standards and more than 200 quality checks to ensure they run in extreme conditions. These tests cover harsh variables

like Arctic wilderness and desert dust storms, including temperature, pressure, humidity, vibration, and other environments.

Security is second nature

Biometrics provide extra protection on the ThinkPad T16 Gen 2 laptop—from the fingerprint reader integrated with the power

button to the facial recognition software that works with the optional IR camera. ThinkShield, our comprehensive suite of security solutions,

is integral to our laptops. Features like discrete Trusted Platform Module (dTPM) encrypt your data. Human-presence detection works

with the optional infrared camera to automatically lock your device when you move away. And Intel vPro® helps prevent attacks to the OS, login credentials, and more.
