

Lenovo ThinkPad X1 Carbon Gen 14 Laptop – Core Ultra X7 368H, 64GB RAM, 1TB SSD, 2.8K OLED, Windows 11 Pro – 21V7008DGR

Description

Lenovo ThinkPad X1 Carbon Gen 14 Business Laptop

Supertech Web Store

The Lenovo ThinkPad X1 Carbon Gen 14 combines an Intel Core Ultra X7 368H processor, 64GB RAM and a 1TB SSD in a 14-inch business laptop. This configuration also includes a 2.8K OLED display, an Arabic keyboard and Windows 11 Pro. It suits professionals looking for a compact screen size with substantial memory and storage for daily work.

X1 Carbon Gen 14 Performance and Memory

The Intel Core Ultra X7 368H processor handles business applications and everyday computing tasks. Meanwhile, 64GB RAM provides capacity for working across multiple applications, documents and browser tabs.

For example, you can keep spreadsheets, presentations and research materials open while preparing a business proposal. However, actual performance depends on your software, workload and system settings.

1TB SSD for Applications and Files

The 1TB SSD provides local storage for business software, documents and project folders. In addition, SSD storage supports responsive file access and application loading.

You can organise client documents, presentations and working files on the same device. For long-term protection, maintain a separate backup of important business data.

ThinkPad OLED Display and Arabic Keyboard

The 14-inch 2.8K OLED display offers a detailed viewing area for text, images and presentations. As a result, it is useful for reviewing documents and visual material throughout the working day.

Additionally, the Arabic keyboard layout supports users who need Arabic input. If your purchasing requirements include a specific bilingual layout, confirm the exact keyboard markings before ordering.

Windows 11 Pro for Business Use

Windows 11 Pro provides the operating system for this configuration. Before deployment, check that your required applications and accessories support the laptop and operating system.

For company purchases, share any software installation or setup requirements when requesting your quotation. This helps clarify what your team needs before delivery.

Warranty and Product Enquiries

Supertech Web Store

This configuration includes a three-year warranty. However, confirm the service type, coverage and applicable terms before purchase.

Contact Supertech Computer Trading for current pricing and availability. To receive an accurate quotation, provide part number **21V7008DGR**, your required quantity and delivery location. Also mention any accessories or setup services you need so the quotation reflects your complete requirements.
