

Lenovo ThinkPad X1 Yoga Gen 8 Intel Core i7-1355U 16GB RAM 512GB SSD  
Windows 11 Pro 14? WUXGA 3 Year – 21HQ006BGR

### Description

**Lenovo ThinkPad X1 Yoga Gen 8 Intel Core i7-1355U 16GB RAM 512GB SSD  
Windows 11 Pro 14? WUXGA 3 Year – 21HQ006BGR**

### Features

### Next-level performance

Powered by 13<sup>th</sup> Gen Intel® Core™ vPro® processors, the Lenovo ThinkPad X1 Yoga Gen 8 2-in-1 laptop takes multitasking to the next level. These CPUs intelligently allocate workloads to the right thread, on the right core, at the right time—which allows for better team collaboration and productivity based on how you're actually using your device. And with Intel® Evo™ certification, you can count on consistent responsiveness, instant wake, all-day battery life, rapid charging, and intelligent video conferencing.

### Productivity booster

Making collaboration a cinch, the Communications Bar on the ThinkPad X1 Yoga Gen 8 2-in-1 laptop is both highly functional and stylish. Multiple camera options with FHD resolution, including a hybrid FHD / infrared (IR) mobile industry processor interface (MIPI) webcam with Computer Vision's added security and webcam privacy shutter included with all of them. What's more, four integrated AI-based noise-cancelling mics with Dolby Voice® and four speakers with Dolby Atmos® deliver superb audio, ensuring your message is heard crystal clear.

Type. Sketch. Swipe.

Thanks to its 360-degree hinge, the ThinkPad X1 Yoga Gen 8 2-in-1 laptop quickly switches between laptop, tablet, tent, and stand modes. No matter where your work takes you, we've got a way to accommodate your style and help get things done, faster. Seamlessly go from typing on the keyboard to sketching, signing documents, or taking notes on screen with the rechargeable, garaged pen. Or just swipe when you're using the device as a tablet.

Conveniently connect to your phone

With Intel® Unison™, you can put your laptop at the center of all that you do. Wirelessly connect your phone—either Android or iOS—to your ThinkPad X1 Yoga Gen 8 2-in-1 laptop. Transfer files quickly and easily, even edit your photos and videos seamlessly on the big screen. Make and answer calls directly from your PC, with full access to your phone's contact list. You can even receive notifications on your laptop, as well as messaging. No need to switch devices when you can do it all in one place.

### Safeguard your data & your system

Biometrics provide extra protection on the ThinkPad X1 Yoga Gen 8 convertible laptop— from the fingerprint reader integrated with the power button to the facial recognition software that works with the IR camera. ThinkShield, our comprehensive suite of security solutions, is integral to our laptops.

Features like discrete Trusted Platform Module (dTPM) encrypt your data. Presence detection automatically locks your device when you move away. And Intel vPro® helps prevent attacks to the OS, login credentials, and more.

We take sustainability seriously

We've committed to net-zero greenhouse gas emissions by 2050, making Lenovo the world's first PC / smartphone maker and one of only 139 companies with a net-zero target validated by the Science Based Targets initiative (SBTi). For the ThinkPad X1 Yoga Gen 8, that means low-temp soldering and a chassis made from recycled aluminum. We use 90% post-consumer content (PCC) recycled plastic in the speaker enclosure, 25-30% PCC recycled plastic in the battery enclosure, and 90% PCC recycled plastic in the power adapter. Packaging is entirely plastic-free.

Quality you can count on

We use the US Department of Defense's MIL-STD 810H standards to create a balance of reliability and durability for our ThinkPad laptops. We test against 12 standards and more than 200 quality checks to ensure they run in extreme conditions. These tests cover harsh variables like Arctic wilderness and desert dust storms, including temperature, pressure, humidity, vibration, and more.

### Double the cool factor

The underside of the keys on our legendary ThinkPad keyboard are designed to create better airflow. Combined with dual fans and rear ventilation, the thermal capabilities on the ThinkPad X1 Yoga Gen 8 2-in-1 keep this convertible laptop cool even when it's working overtime.
