Designed to work for you

If you’re a designer, an engineer, or a student, the ThinkStation P360 Tower workstation promises the ideal solution for versatility, flexibility, and breakthrough performance—without compromising on computing power. And with ISV-certified applications, you can rely on this powerhouse to perform and trust that your applications are tuned to run seamlessly on your most complex tasks.

Engineered for reliability

Easy component access means your system can grow along with your business, and the reliability that’s built into each ThinkStation system means you’ll keep it around. Our Lenovo ThinkStation P360 i7 Tower workstation are engineered for durability. They pass more than 200 quality checks and 18 MIL-SPEC STD-810G tests to ensure performance in the harshest conditions— from the Arctic freeze to desert dust storms.

We’ve got your back

The ThinkStation P360 Tower workstation is protected ThinkShield, a suite of hardware and software that work together to safeguard both your device and your data. Trusted Platform Module (TPM) 2.0

encrypts your data, while various programs prevent access to the BIOS—and even self-heal if corrupted. Plus, Windows provides firmware update support and helps to guard your device.

***Features shown below may not be available on all products. Please refer to product details page for specific product features.**
***Image is for illustrative purposes. Actual touchpad has four haptic sensors.**
