DOS 1 Year – 30FMS1Q500**

Features

Supertech Web Store

Shown with optional optical disc drive, front access storage bay and memory card reader

Perfect mix of value & performance

The ThinkStation P360 Tower workstation features 12th Gen Intel® Core™ processors with scalable hybrid architecture,

data integrity, and built-in security features. Plus, add optional professional NVIDIA® graphics, including VR-Ready NVIDIA® RTX™ A5000,

loads of ultrafast DDR5 4000MHz memory, and up to dual M.2 NVMe PCIe Gen 4 SSD storage.

Shown with optional optical disc drive, front access storage bay and memory card reader

Designed to work for you

If you're a designer, an engineer, or a student, the ThinkStation P360 Tower workstation promises the ideal solution for versatility,

flexibility, and breakthrough performance—without compromising computing power. And with ISV-certified applications,

you can rely on this powerhouse to perform and trust that your applications are tuned to run seamlessly on your most complex tasks.

Shown with optional optical disc drive, front access storage bay and memory card reader

Engineered for reliability

Easy component access means your system can grow along with your business, and the reliability built into each ThinkStation

system means you'll keep it around. Our ThinkStation workstations are engineered for durability. They pass more than 200 quality checks,

and 18 MIL-SPEC STD-810G tests to ensure performance in the harshest conditions— from the Arctic freeze to desert dust storms.

Shown with optional optical disc drive, front access storage bay and memory card reader. Monitor sold separately.

We've got your back

The ThinkStation P360 Tower workstation is protected ThinkShield, a suite of hardware and software that work

together to safeguard both your device and your data. Trusted Platform Module (TPM) 2.0 encrypts your data, while various

programs prevent access to the BIOS—and even self-heal if corrupted. Plus, Windows provides firmware update support and helps to guard your device.

Let IT do what they do best

Consider a flexible approach to IT procurement, Lenovo Device as a Service (DaaS). Designed to free up time and capital,

it combines devices, service support, and software into fixed monthly payments. And by taking care of lifecycle management

enables your IT resources to focus on what they do best.

Ports/Slots

Two Lenovo ThinkStation P360 tower workstations side-by-side, one front facing and the other rear facing
