

Lenovo ThinkSystem SR250 V2 XEON E-2378 32GB O/B 2.5 HS 5350 450W – 7D7QA031EA

Description

Lenovo ThinkSystem SR250 V2 XEON E-2378 32GB O/B 2.5 HS 5350 450W – 7D7QA031EA

Powerful 1U server for your evolving needs

The ideal single-socket 1U rack server for growing businesses offering power, reliability, and flexibility for space constrained installations.

High reliability and security

The Lenovo ThinkSystem SR250 V2 offers reliability, and security without sacrificing performance. This single-processor rack server,

in a compact 1U form factor, is built for expanding businesses or edge deployment.

With an increase in performance of up to 17% above previous generations, the next-generation Intel® Xeon® E-2300 processors provide higher workload performance at an entry-level price point.

Flexible, scalable and manageable

Flexible, scalable and manageableThe ThinkSystem SR250 V2 offers flexibility via multiple configurations with

TruDDR4 memory, GPU support, and an array of storage options. Ideal for IT infrastructure, web serving, virtualization, and edge applications.

The SR250 V2 includes the Lenovo XClarity Controller, that standardizes and automates server management tasks.

The XClarity Administrator virtualized application centrally manages your ThinkSystem servers, storage, and networking, lowering costs and speeding infrastructure provisioning.

ThinkSystem

Energy-efficient powerhouse

The ThinkSystem SR250 V2 provides enterprise-level, 8 core performance while using no more than 95W CPUs.

It's shorter-depth rack accommodates the space-constrained environments found in many SMB's, remote/branch offices, and edge applications.

The ThinkSystem SR250 V2 is an ideal solution when your business needs a server to handle large workloads in a small footprint.
