

Lenovo ThinkVision S27i-30 Led Monitor – 63DFKAT4UK

Description

Lenovo ThinkVision S27i-30 Led Monitor – 63DFKAT4UK

Overview

The ThinkVision S27i-30 Monitor is easily the most practical choice to carry out daily office-related tasks. Its 27" In-Plane Switching screen displays rich delightful colours and clarity with Full-HD 1920 x 1080 resolution. A 99% sRGB colour gamut offers you consistent colours and sharper images no matter the viewing angles. In a brand new, stylish and sophisticated Storm Grey colour. Its borderless design affords a distraction-free viewing experience both in a single and multi-system setup. Built-in Natural Low Blue Light technology filters out harmful blue light without affecting the picture quality to support extended screen time while reducing eye strain. A good selection of ports including HDMI, VGA, and audio out ensures easy connections with accessories so that you get all the tools you need for your work. Comfort is part of the package with the monitor's tilt functionality that allows you to adjust the screen to suit your posture. You can also VESA-mount it to suit your preferred viewing position. The monitor's stand features a built-in phone rack and cable management clips, to give you a clutter-free desktop and more space. A nifty joystick on the monitor enables you to easily navigate and change the display characteristics as per your preference. But best of all, the ThinkVision S27i-30 is in tune with the latest TCO 9.0 regulations and comes in green packaging, making it safe for the environment and you.

Looking for a budget-friendly and sleek display? The [Lenovo L24i-4A 23.8" Monitor LED](#) with a Full HD resolution and ultra-slim design is perfect for everyday tasks and now available at Supertech for the best deals.
