

Lenovo ThinkVision T22v-20 21.5 FHD VoIP Monitor – 61FBMAT6UK

Description

Lenovo ThinkVision T22v-20 21.5 FHD VoIP Monitor – 61FBMAT6UK

The **Lenovo ThinkVision T22v Monitor** is designed for clear, crisp conferencing and daily work. Featuring a 21.5" Full HD IPS display with 250 nits brightness, it delivers vivid visuals and wide viewing angles. Backed by a 3-year warranty, this monitor ensures reliability and enhanced productivity.

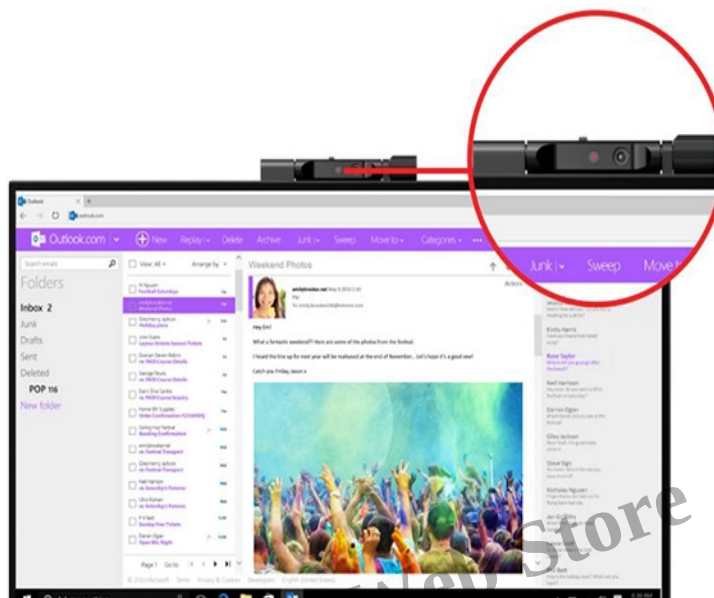

Features

Astounding clarity & versatility

The versatile P27u-20 monitor delivers a brilliant, consistent performance across a range of creative

areas. This pre-calibrated monitor offers DCI-P3 & HDR 4K resolution for stunning UHD performance. It comes with an IPS screen that offers excellent 178° viewing angles and a dual wide color gamut (99.1% DCI-P3 and 99.5% Adobe RGB) to satisfy both video and graphic content creators. Its VESA DisplayHDR™ 400 offers superb realistic brightness and darkness.

Uncompromised Security

Privacy is safeguarded with the ThinkShutter that physically covers the camera when not in use. For enhanced privacy, a smart auto-alarm function notifies you if the camera or microphone is in use. The IR camera coupled with Windows Hello ensures secure facial recognition for quick, secure logins.

Amplified Productivity

An angle-adjustable camera, inbuilt with smart face-tracking technology automatically adjusts the user's face to the center of the screen, optimizing the display for a perfect VoIP meeting. Dedicated speaker and microphone control keys make it easy to toggle audio and video during meetings. Increased lift range and tilt angle on this monitor allow you to adjust it to a comfortable position.
