Great performance in minimal space

Rely on the Lenovo V30a (22?) all-in-one PC to tackle your business computing without taking up a lot of space. Its compact footprint minimizes clutter while its 10th Gen Intel® Core™ processor accelerates productivity. The Smart Conference feature enhances collaboration, while hearty security features round out the perfect PC for your business venture.

Performance means productivity

With up to 10th Gen Intel® Core™ i5 processors, speedy PCIe SSD storage, and up to 32MB DDR4 memory, the Lenovo V30a (22?) all-in-one is a powerful, responsive business PC. Its 21.5? display is great for viewing large spreadsheets and long-form documents. Its Modern Standby feature reduces power consumption while allowing for instant email updates and VoIP access, even when the PC is inactive.

Protect your data & privacy

Restrict port access with Smart USB Protection to protect against data theft. Security features fully disable ports and the webcam via the PC's BIOS, securely erases data, and restricts hard drive access via password. Protect your privacy with a dedicated shutter on the optional camera.

Accessories sold separately.

Improved user comfort

With its 92% screen-to-body ratio and Full HD resolution, the 21.5? anti-glare display yields impressive visual clarity. If your workspace requires wall-mounting, never fear—the display is also VESA-compatible. Or use the ergonomic stand for convenient tilt, and swivel functionality. Low Blue Light and Ultra Low Noise certifications further guarantee your comfort as you work.

Enhanced video conferences

Smart Conference makes teleconferencing easy, with clear audio. Filter out background noise and enhance the speaker's voice from any direction, in a single- or multiple-participant meeting. Make collaboration seamless and efficient.
